QUALIFICATION FILE - Standard

Supervisor (Rail Operations and Management)

Type of Training: Short Term Training (STT)

Type of Qualification: General

Type of Categories: Upskilling

NCrF/NSQF Level: 5

Submitted By:
DEDICTAED FRIEGHT CORRIDOR CORPORATIONOF INDIA LTD
Email : heavyhaulinstitute@gmail.com , Website : https://dfccil.com

Section 1: Basic Details

1.	**Qualification Name**	Supervisor (Rail Operations and Management)	
2.	**Sector(s)**	Transportation Logistics and Warehousing	
3.	**Sub-sector(s)**	Rail Operations and Management	
4.	**NCO/ISCO Code(s)** *(If code is not available then mention the same.)*	NCO Code : N/A , ISCO Code :N/A	
5.	**Occupation(s) Name** *(As per Occupational Map or NCO if available.)*	Supervisor	
6.	**Type of Qualification:** New **Qualification has:** Not applicable *(Select none, both or either, as applicable)*	**7. If *Type of Qualification* is Revised, provide Existing Qualification Details** *(As per NQR)* **:** **a. Qualification Name :** N/A **b. NQR Code:** N/A **c. Version:** N/A	
8.	**Qualification, if Developed in Collaboration with MNC*** *Multinational Companies (MNCs) and Leading Indian Enterprises including Original Equipment Manufacturer (OEM), Original Design Manufacturer (ODM) and Value-Added Reseller (VAR) â€' Refer relevant NCVET Guidelines.*	**a. MNC Name:** N/A **b. Qualification Name as per MNC:** N/A	
9.	**National Qualification Register (NQR) Code and Version** *(Issued after NSQC approval)*	**a. NQR Code:** N/A **b. Version:** N/A	**10. NCrF/NSQF Level:** 5
11.	**Award (Certificate/Diploma/Advance Diploma/ Any Other)**	Certificate	
12.	**Brief Description of the Qualification**	The Supervisor is responsible for ensuring the safe, efficient, and timely movement of freight trains along the Dedicated Freight Corridor. This role involves overseeing operational activities such as train management, yard operations, and adherence to safety regulations. Additionally, the Supervisor plays a crucial role in the business development aspects by managing goods handling, utilizing relevant IT systems like DFIS and COA.	

		This role requires a strong understanding of railway operations, attention to safety, and the ability to contribute to DFCCIL business objectives through efficient and customer or client focused operations.

13.

Eligibility Criteria for Entry for Students/Trainee/Learner/Employee :

a. Entry Qualification and Relevant Experience:

S.No.	NSQF Level	Academic /Tech Education Completed	Specialization (Academic /Tech Education Completed)	LTT/STT Completed	Specialization (LTT/STT Completed)	Academic /Tech Education Pursuing	Specialization (Academic /Tech Education Pursuing)	Previous NSQF Levels Achieved	Relevant Experience in Years	Relevant Specialization	Remarks
1	5	03-year UG or equivalent	degree in Management or Business Administration with specialization in Marketing, Finance, or Operations.	N/A	N/A	N/A	N/A	N/A	No Experience required	N/A	N/A
2	5	Completed NSQF level 4.5 with	N/A	N/A	N/A	N/A	N/A	4.5	1.5 year relevant experience	operations, logistics, business development, or transport management is preferable	N/A
3	5	03 year Diploma after 10th	N/A	N/A	N/A	N/A	N/A	N/A	2 -year experience in relevant fields	operations, logistics, business development, or transport management is preferable	N/A

b. Age *(Please specify age only in case of any legal restrictions)* : N/A

14.	**Training Duration by Modes of Training Delivery** *(Specify training Duration as per selected training delivery modes and as per requirement of the qualification. Refer Blended Learning guidelines and provide details in the Annexure.)*	Training Mode : Offline **a. Minimum Notional Hours** : 600 **b. Maximum Notional Hours** : 600

<table>
<tr><td>15.</td><td>Credits Assigned to this Qualification, Subject to Assessment
(As per National Credit Framework (NCrF). If qualification has Electives or Options, specify both Minimum and Maximum Credits.)</td><td>a. Minimum Credits : 20.0
b. Maximum Credits : 20.0</td></tr>
<tr><td>16.</td><td>Credits Validity Period
(As per NCrF SOP)</td><td>7 Years</td></tr>
<tr><td>17.</td><td>Common Cost Norm Category (I/II/III)
(Wherever applicable, as per CCN notification):</td><td>Not Applicable</td></tr>
<tr><td>18.</td><td>Any Licensing requirements for Undertaking Training on this Qualification

23.	**Is this Qualification for PwD ?**	No	
24.	**List Action Plan/Strategy for Encouraging Active Participation of Women**	We are actively reinforcing our commitment to gender equality by creating a safe, respectful, and harassment-free environment for all employees. Clear anti-harassment policies are in place, and training facilities are equipped with women-friendly amenities.	
25.	**Are Greening/ Environment Sustainability Aspects Covered** *(If yes, specify the Component which covers it, else provide rationale for not including this aspect in the qualification.)*	No **Component Details:** NA **Rationale:** Related to Rail operation and Management	
26.	**Is Qualification Suitable to be Offered in Schools/Colleges**	N/A	
27.	**Name and Contact Details of Submitting / Awarding Body SPOC** *(In case of Cross-Sectoral or Multi-Skill qualification provide details of both Lead AB and Supporting ABs.)*	**Name:** Col Mayank Upadhya **Email:** m.upadhya@dfcc.co.in **Contact No.:** 9013733471 **Website:** https://dfccil.com	
28.	**Date of Approval by NSQC:** 30/07/2025	**29. Validity Duration:** N/A	**30. Next Review Date:** N/A

Section 2: Module Summary

NOS(s)/MC(s)/NC(s)/Module of Qualifications

NOS- *National Occupational Standards* ***MC***- *Micro-Credential* ***NC***- *Nano-Credential*

Specify the training duration and assessment criteria at NOS/MC/NC/Module level. For further details refer to the curriculum document.

Formative assessment marks of the qualification to be included in result calculations: No

(Formative assessment for a qualification is optional. If the check box is checked, then the specified Formative assessment marks are to be included in the ***Total****.)*

Note: For all hands-on, practical, and viva assessments, video evidence needs to be captured and maintained through the assessment platform.

Compulsory Components:

Th. - Theory **Pr.** - Practical **OJT Man.** - On the Job Mandatory Training **Proj.** - Project

Mandatory:

6. **Evidence of Concurrence/Consultation with Line Ministry/State Departments :** Yes

Annexure: Evidence of Level

NSQF Domain	Key requirements of the job role/ outcome of the qualification	How the job role/ outcomes relate to the NSQF Level Descriptor
Professional Theoretical Knowledge/Process	Possesses knowledge in multidisciplinary contexts, broadly, within the chosen fields of technology/ skills/ job role. Deeper knowledge and understanding of specialized field of technology / skills/ job role and its underlying principles, Acquired specialized knowledge and a range of cognitive and practical skills to accomplish tasks like basic design, prototyping, testing so as to solve a problem by selecting appropriate information, methods, tools, and materials.Multidisciplinary and specialized knowledgePossesses broad and deep knowledge and skills to solve problems in specialized fields.	The Supervisor is responsible for overseeing the maintenance and inspection of station operations and management. They must promptly address any accidents or unusual incidents at their station. The Supervisor ensures that all necessary tools, registers, safety equipment, and inspection forms are prepared and brought along for each visit. Additionally, they are tasked with arranging the crew, managing stable load distribution, and handling the placement and removal of goods sheds, sidings, and terminating/originating trains, while maintaining accurate records and monitoring shunting operations.The Supervisor plays a crucial role in ensuring adherence to relevant standards, such as DOPT guidelines and HR manuals, and provides recommendations based on inspection results. They are also responsible for collaborating with other departments and teams to ensure the timely completion of maintenance tasks, keeping accurate records, and following up on corrective actions. Furthermore, the operator is required to review the Signal Interlocking Plan, Station Working Rule Diagram, Traction Working Rule Diagram, and Station Working Rules to ensure compliance with the yard layout.
Professional and Technical Skills/ Expertise/ Professional Knowledge	Demonstrates cognitive specialised professional and technical skills required for performing and accomplishing difficult tasks relating to the chosen field /s of technology / skills/ job role; successfully applying techniques in routine or non-routine, Possesses a range of professional and technical skills, displays clarity of knowledge and practice in broad range of activities/ tasks. Project Management Skills, Skill to clearly identify the relevant tools or sometimes improvise the available tools and techniques; and has advance knowledge of materials in difficult situations and different contexts. Very good in data collecting organizing information, analysis and communication of results for informed decision making.Range of skills along with specialized domain skillsExcellent cognitive skills and technical prowess utilized to perform complex tasks with ease, project management expertise, and adept at data analysis for informed decisionmaking.	The role of a supervisor in the context of Indian freight railways demands a thorough understanding of both technical and professional knowledge, particularly in train operations, railway mechanics, OHE, predictive analysis, maintenance, and station management.The Supervisor must be skilled in managing complex tasks, such as scheduling trains, overseeing resource management, and ensuring efficient train operations while adhering to safety protocols and risk management guidelines. Their work requires applying advanced technical and analytical skills, such as predictive maintenance techniques and data analysis, to make informed decisions. The role also requires strong project management expertise, as the Supervisor coordinates both human and technical resources, ensuring that operations and maintenance are executed on time and meet the required standards. The Supervisor must display leadership qualities by independently making decisions in emergency situations, managing teams, and ensuring that safety and regulatory standards are always followed. Furthermore, the Supervisor must demonstrate a high level of autonomy in managing operations at stations and control centres, making critical decisions related to safety and operational efficiency. The role requires continuous improvement, adaptability to new technologies, and a proactive approach to risk management, reflecting an entrepreneurial mindset. In addition, the Supervisor applies specialized professional and technical skills to routine and non routine tasks, ensuring smooth operations even in the face of unexpected challenges. This role is a blend of cognitive proficiency, technical expertise, problem solving, and leadership, aligning with NSQF level descriptors for higher level supervisory roles in complex technical environments.
	Possesses excellent oral and written communication and collaboration skills for clearly taking the vision of the leaders to the shop floor level workforce. Possesses very good Digital, Financial and Legal Literacy to use them effectively, Has a good understanding the constitutional, humanistic, ethical, and moral values. Organisation and Time Management, Very good in	The role of Supervisor requires a strong employment readiness and an entrepreneurial mindset, which are critical to managing the dynamic and fast-paced environment of freight railway operations. Employment readiness involves not only the technical and professional expertise required to operate and manage train services effectively but also the soft skills necessary to adapt to evolving situations, coordinate with multiple departments, and ensure the safety and efficiency of railway operations. The Supervisor must exhibit professional skills such as excellent communication, leadership,

Employment Readiness & Entrepreneurship Skills & Mind-set /Professional Skill	complex calculations, and mathematical and financial analysis skills for applied solutions. Has well informed practical understanding of the social, political and work environment. Exercise self management within the work contexts. Emotional Intelligence, May have an entrepreneurial Mind set for creating a startup/ small businesses and its end to end managementEntrepreneurial mindset, self managementA versatile professional with excellent communication, digital and financial literacy, ethical values, self management and may have entrepreneurial mindset	decision-making, and problem-solving abilities, which are essential for ensuring smooth operations and responding to unexpected challenges like accidents or operational disruptions.An entrepreneurial mindset in this role means being proactive, identifying opportunities for continuous improvement, and innovation in operational processes. He/ she must be adaptable, willing to embrace new technologies, and capable of managing risks while maintaining operational efficiency. They need to make independent decisions, particularly when dealing with maintenance issues or unexpected circumstances, while ensuring that safety standards are never compromised. Furthermore, the role demands the ability to think critically, manage resources effectively, and handle complex logistical challenges, all while focusing on long-term goals and outcomes.
Broad Learning Outcomes/Core Skill	Demonstrates a wide range of specialized professional and technical skill in broad range of activity involving standard and non-standard practices. Apply the acquired specialized knowledge and a range of cognitive and practical skills to accomplish tasks like basic design, prototyping, testing so as to solve problems by selecting appropriate information, methods, tools, and materials. Communication and collaboration skills to act as a layer between the senior management and workforce/ shopfloor. Should be able to listen and understand properly and present complex information in a clear and concise manner, make judgement and take decision, based on the analysis and evaluation of information, for determining solutions to a variety of unpredictable problems associated with the chosen fields of learning, Takes responsibility for the nature and quality of outputs. Is able to work on processes to improve the quality of outputs, Can analyze and synthesize ideas, Uses discretion and judgement over a range of known and innovative responses to familiar and unfamiliar problems and issues.Judgement / decision making specializedA skilled professional with technical expertise, adept at solving complex problems and improving output.	The broad learning outcomes and core skills for a Supervisor encompass a range of technical, operational, and leadership competencies. He/ she must demonstrate technical proficiency in railway operations, including understanding signal interlocking, traction systems, and maintenance procedures, while ensuring compliance with safety protocols. They must be adept at managing operational efficiency, such as coordinating train schedules, resources, and overseeing station operations. Critical problem-solving and decision-making abilities are necessary to address unexpected issues, delays, or accidents, all while maintaining safety and efficiency. The role also requires strong leadership skills to manage teams, supervise operations, and make independent decisions when required. Effective communication is vital for interacting with crew members, stakeholders, and passengers, particularly during operational disruptions. Risk management skills are essential to proactively identify and mitigate potential risks, ensuring continuous safe operations. Additionally, the He/ she should exhibit adaptability and innovation, embracing new technologies and continuously improving processes to enhance operational performance. These core skills collectively enable the Supervisor to effectively manage complex tasks while upholding high standards of safety, efficiency, and leadership.
Responsibility	Is accountable for determining and achieving personal and /or group tangible outcomes, Handles/ / adapts/ accommodates change requirements and change management at the ground/ shop floor level. Team Building, Manages processes and procedures within broad parameters for defined activities. Supervises the routine work of others, takes the required responsibility for the evaluation and improvement of work or study activities. At level 4.5 the candidate is Highly skilled and works as a Junior Technical Supervisor. Constantly motivates, guides, mentors and trainsthe workforce. At level 5.0 the candidate is a Technical supervisor or junior/ deputy manager. Is responsible for managing an independent work unit/ shop floor/ section/ business activity/ assignmentTeam leader Junior technical supervisor, Technical supervisor or junior/ deputy manager.Highly skilled Technical Supervisor responsible for achieving tangible outcomes, managing change, building teams, and mentoring the workforce	The responsibilities of a Supervisor, a range of tasks aimed at ensuring safe, efficient, and compliant railway operations. They are responsible for managing train operations, including scheduling and coordinating train movements, load management, and the proper placement and removal of goods trains, sidings, and terminating/originating trains. They oversee station operations and ensure adherence to safety protocols and operational standards, particularly at the Operation Control Centre (OCC) and Central Control Centre. He/ she is also responsible for maintenance and inspection, ensuring that necessary tools, registers, safety items, and inspection forms are prepared for each visit, while supervising and ensuring timely maintenance completion. Ensuring compliance with safety protocols and effective risk management is a critical responsibility, including responding promptly to accidents and unusual occurrences. As a supervisor, He/ she leads and coordinates with crew members, maintenance teams, and other departments to ensure smooth operations, offering guidance and leadership to ensure efficiency. They also maintain regulatory compliance, ensuring operations meet industry standards and keeping accurate records of inspections, incidents, and corrective actions. The role requires strong problem-solving and decision-making abilities, particularly when addressing operational issues or emergencies. Additionally, they manage resources effectively, ensuring that all necessary crew, tools, and equipment are available and ready for each train operation. He/ she is proactive in seeking continuous improvement, implementing new processes and technologies to enhance efficiency and safety. Finally, maintaining clear communication with all stakeholders ensures smooth operations and timely resolution of any issues that arise.
